All American Jerr-Dan Wreckers and Carriers Reports Increased Demand for Commercial Towing Equipment and Fleet Support in Central New Jersey

May 14, 2026

OLD BRIDGE, NJ - May 14, 2026 -

All American Jerr-Dan Wreckers and Carriers, an authorized Jerr-Dan dealer based in Old Bridge, New Jersey, has reported increased activity involving towing equipment sales, fleet servicing, and parts support across Central New Jersey. The company stated that towing operators and commercial transport businesses throughout the region are continuing to invest in recovery vehicles and fleet maintenance as roadside recovery demands and transportation activity remain active across Middlesex and Monmouth counties.

The company serves commercial operators in Old Bridge, Sayreville, East Brunswick, South River, and surrounding communities. Its operations include towing equipment sales, truck parts support, repair services, and fleet assistance for towing companies, roadside assistance providers, municipal fleets, and commercial transport operators.

According to the company, recent activity involving rollback carriers, wreckers, and fleet servicing has reflected broader transportation and recovery trends throughout the region. Increased roadway traffic, transport demand, and commercial vehicle use have driven the ongoing demand for towing and recovery

support services. Operators managing roadside recovery assignments frequently require access to replacement towing parts, maintenance scheduling, and recovery equipment to support daily commercial operations.

All American Jerr-Dan Wreckers and Carriers stated that service activity has continued to increase in areas involving fleet maintenance, towing equipment inspections, and recovery vehicle servicing. The company also noted that commercial towing operators are increasingly prioritizing operational continuity and repair scheduling to help reduce fleet downtime.

The owner and manager of All American Jerr-Dan Wreckers and Carriers stated that towing businesses continue to face operational challenges related to transportation demands and fleet management.

?Commercial towing companies continue adapting to changing transportation activity and recovery demands throughout the region,? the owner said. ?The focus remains on helping operators maintain access to equipment support, servicing, and fleet resources needed for daily recovery operations.?

The company maintains inventory involving Jerr-Dan wreckers and rollback carriers used for roadside recovery and vehicle transport applications. In addition to towing equipment availability, the company also operates service and parts departments that support fleet operators managing commercial recovery vehicles and transport equipment.

According to the company, fleet customers frequently seek support for replacement towing parts, scheduled maintenance, and repair coordination for operational recovery vehicles. Mobile service support has also become increasingly important for operators attempting to minimize interruptions during active commercial towing schedules.

Commercial towing and roadside recovery businesses throughout Central New Jersey continue to support a wide range of transportation needs, including vehicle transport, accident recovery, roadside assistance, and municipal towing operations. Recovery vehicles often operate under demanding roadway conditions involving high traffic volumes, long operational hours, and ongoing transport assignments.

The company stated that operators are also placing increased attention on long-term equipment planning and recovery fleet management. Businesses managing multiple towing vehicles frequently evaluate service accessibility, repair scheduling, and parts availability when planning future fleet operations.

Recent customer feedback cited by the company focused on communication, scheduling flexibility, and post-sale support for commercial vehicle transactions and servicing coordination. Company representatives noted that feedback from towing operators and transport businesses helps identify operational priorities tied

to fleet support and recovery vehicle maintenance.

All American Jerr-Dan Wreckers and Carriers also stated that commercial transport operators are continuing to evaluate equipment replacement timelines and fleet expansion opportunities tied to evolving transportation demands. Rollback carriers and medium-duty wreckers remain among the most commonly requested vehicle categories associated with roadside recovery and commercial towing activity throughout the region.

In addition to towing equipment support, the company works with operators managing mixed commercial fleets that use multiple truck platforms for transport and recovery applications. Fleet servicing and repair scheduling continue to represent a significant area of operational planning for many commercial operators throughout New Jersey.

According to the company, transportation activity throughout Central New Jersey is expected to continue influencing roadside recovery operations and fleet servicing requirements over the coming months. Commercial towing companies are expected to remain focused on vehicle maintenance, operational scheduling, and accessibility of recovery equipment as transportation and recovery demands continue across the region.

All American Jerr-Dan Wreckers and Carriers stated that it will continue monitoring fleet support activity and servicing needs involving towing operators throughout Old Bridge and nearby New Jersey communities.
